The screenshot displays a music theory application interface with a dark background and a diamond-patterned grid. At the top left, there are navigation icons: a home button, a hand icon, a square icon, and a magnifying glass. The top center shows the number "1.01".

In the upper left, a piano keyboard diagram is shown with keys labeled "D", "E", "F", "G", "A", "B", "C", "D", "E". The "D" key is highlighted in orange. Below this, a musical staff with a treble clef shows a sequence of notes: C<sup>4</sup>, D<sup>4</sup>, E<sup>4</sup>, F<sup>4</sup>, G<sup>4</sup>, A<sup>4</sup>, B<sup>4</sup>, C<sup>5</sup>, D<sup>5</sup>, E<sup>5</sup>, F<sup>5</sup>, G<sup>5</sup>. A bass clef staff below it shows notes: E<sup>0</sup>, F<sup>0</sup>, G<sup>0</sup>, A<sup>0</sup>, B<sup>0</sup>, C<sup>1</sup>, D<sup>1</sup>, E<sup>1</sup>, F<sup>1</sup>, G<sup>1</sup>, A<sup>1</sup>, B<sup>1</sup>. A question mark "?" is located at the bottom left of the staff area.

In the center, a piano keyboard diagram is shown with a blue circle around the "LA" key. A blue line connects this key to a grey sphere. A red line connects the sphere to another red sphere. A yellow line connects the "LA" key to a yellow sphere. A small camera icon is visible below the "LA" key.

At the top center, a white box contains the text: "Start 0", "Inter 2", "Num 999".

At the bottom right, there are navigation controls: a double left arrow, a double right arrow, a square icon, and a red circle.

She is the source of all your evil.  
If she dies, so do you!

i'm trying to use playclaw but whenever i launch it it dissapears and i dont know what to do and i dont even touch anything it might be my computer but i just need this to work its also kind of complicated i still recommend it though. A simple game (early access); and very rogue-like for those who played rogue back in the 80's. Worth playing.

In short - I really like it; but have only made it to the 1st boss a few times (I do not game often). It is harder at first, but if you plan to die and test how things work, it makes later runs easier.

General discription - Pick up items, use sword and/or wand to slay enemies. The enemies are not bright, but it works.

The real bonus to this game is the game development. On the first weekend release, players left the developers comments and they were implimented by the end of the weekend. I have left a long list which included far fututre suggestions - these were all implemented in 1 week. I will not hold the developer to that short of time line; but most other games when I and the community leave comments on critial errors; they go unattended for a year+, or ignored. So thank you to the developers for listening and responding quickly to improve the game (I.E. Caring about players, their ideass, and the ggame itself).. I spent far too many hours in the demo, worried if an adult should buy a kitten game aimed at toddlers. Just do it. I'm in my 40s and love it as a game to just chill in. Not only is it pretty, but there are seasons and day and night cycles. Your kitten posse that you gather with each rescue even helps out, though I'm not sure if it's on purpose. But you can bounce off them to execute a super double jump, results will vary.

Some of the fish are a challenge to jump to for a game aimed at wee ones, but they have to learn platforming sometime. In the full game there are plenty of places to explore and things to do. Honestly tripping humans and knocking things off tables never gets old. You can also take a break to "paint", visit space, or hit the beach. As it's an all around labor of love, it got my vote for the upcoming awards. Best of luck to the dev, it's amazing to see how far this game has come.

As for kids? It's rare anymore to see a game with no violence so they'd be fine and if they keep at it they will learn platforming basics such as jumping, and having to try repeatedly to master tricky jumps. There are also hidden areas to find on the maps, and tricky fish to puzzle out the way to, all skills future gamers need. There is no punishment for failing a jump or missing kittens, so it's a good game to start out on.. I really wanted to like it, the music and art is top notch, but the story elements are not randomized enough; on 4 different playthroughs only two different stories were told, not enough to justify the \$10 price tag, imho.. It's not a rip off of Tropicco. It's a rip off of Dictator on the ZX Spectrum.

Which would be great. I've wanted a new version of Dictator for years. As a cheap text game, it would be fun.

Sadly, Sim Junta has less random events, a worse UI and is generally less fun than Dictator.

When you're outclassed by the 1983 8 Bit game you're based on, something has gone badly wrong.. 3minutes total time to finish the campaign? Really? But then you have the option to play the survival mode which is there to try to make this look like an actual game.

Why would someone publish that? Just stay away for your own sake.. I can go at my own speed. not too hard, but keeps me interested.. Just another puzzlegame / math game.

Hard to do anything wrong.

Meh. worth two bucks if you're really bored. I certainly was.. this needs to stay in early access for much, much longer. This route is fairly good, but it has some low frame rates when traveling at high speeds. Recommend you buy the CRH380A along with this pack since it can reach the top speeds allowed on this route. Also, there are no scenarios for this route in the CRH380D.

Pros:

- good for going at 350 km/h
- does not need to download asset packs. The Just Trains version requires asset packs, but this downloads it together.
- nice detailed cabs
- stations are detailed
- good AI traffic. When I drive the CRH380A, the AI includes CRH380A's

Cons:

- Low frame rate
- no speedometer in the passenger mode (the real one has a display that shows speed)
- objects sometimes pop out when traveling fast
- no CRH symbol on CRH1A, CRH1E
- emergency stops may be annoying if you just want to go fast

Overall, this product is a 9\10. Strongly recommend with the CRH380A.. If you are on the fence about getting this game, I cannot recommend it highly enough. Tons of replay value and the developer is always adding FREE content to the game.. Good afternoon I bought this game and there is a problem when you start playing Do not use the hand of your pc and xbox but Hatta if I am using the keyboard Please fix bugs and make the game work, however xbox. Simple and relaxing puzzle. This game is unplayable there are so many tech bugs I dont know where to start. My 1.8 hrs on record has not been playing the game it has been looking at a frozen screen just before it loads a track up. no support from the dev team can not believe i waisted 39.99 on this game.. A Really Bad Rust Clone. Don't waste money on this!. I am unable to recommend this game. I purchased it, played a few hours and then refunded. It is extremely laggy, the click functionality is extremely slow and you often have to click again and again. The entire new design of the game just didnt work for me and I love all the Game House stories. Such a pity because I was so excited to play.
