About This Game

The castle within the town of Cloudfall has been taken over by an evil demon. Prince Helios has offered a huge bounty to anyone who's able to clear his family's castle and restore order into town. It is your task, as an adventurer to help defeat this evil, bring peace and gain whatever it is that's driving your own personal motivations.

Characters

Samano

Samano is a Ronin who hears about the demon and wants to do this job of slaying the demon to bring honor and wealth to her fame.

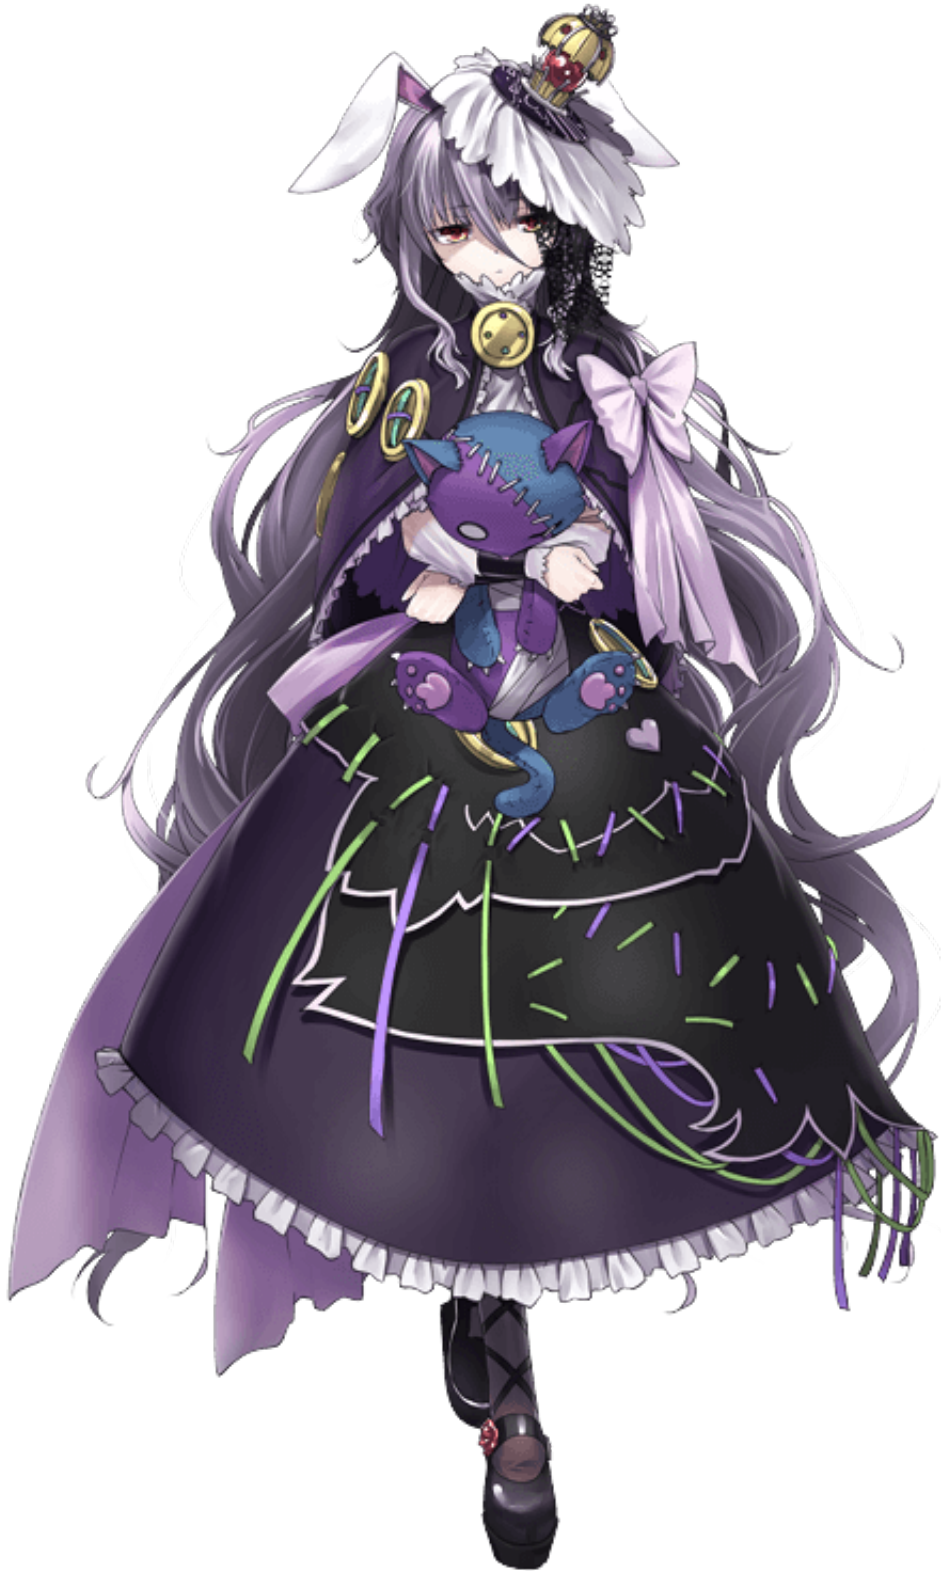

Wilhelmina

Wilhelmina is a country girl who loves to fight, the stronger the opponent the better. She thinks of herself as the greatest demon

hunter ever and wants to kill the demon to prove that right.

Slavia

Slavia is a Sorceress who wants to capture the demon. She's not interested in money or fame, she just wants a plaything that she can torture for fun and no one will judge her, if it's an evil demon that she can use for her sadistic fun.

Hacathra

Hacathra is a cleric, as a spiritual and a follower of a light, she's by her very nature drawn towards the vanguard of the demon. She's not really interested in money or fame and feels that this is simply said, her duty to smite the evil.

Aurae

Aurae is a hunter and a mercenary. She does help people for small moneys and volunteers to aid in destroying the demon, in

exchange for some money.

Miwafin

Miwafin is a genie, who has received a wish about the demon's demise. While Miwafin is not the most powerful genie in the world, she is determined to fulfill the wish and end the demon's rampage, no matter what the cost.

Michi

Michi is a fun loving catgirl, who spends most of her time doing cat things, like scratching things and being lazy. However, she volunteers destroying the demon in exchange for all the milk that she can drink. (She can drink a lot of milk.)

Bentley

Bentley is a pirate, who hears about the demon. This is no good for anyone and business would suffer, so she offers to get rid of

the demon in exchange for gold and jewelry.

Features

- 8 playable characters to choose a 4 person party from
- Playable classes; Samurai (Refined Strangers of the Power 1 Warrior), Sorcerer (Refined Strangers of the Power 1 Mage), Priest (NEW!), Warrior (NEW!), Martial Artist (NEW!), Genie (NEW!), Hunter (NEW!), Pirate (Refined Strangers of the Power 1 Rogue)
- Leveled enemies for tougher, yet more rewarding gameplay
- Create new potions and upgrade existing ones with the brand new Alchemy system!

good game value.i like the bowling best, all the games are simple to start and play.there is something for everyone,. The model itself is decent. All the features brought it down.

I like how they made the three engines start up as needed, but the rest isn't so good.

The ditch lights look completely off when they are on, they have no flare at all and there is a very unnoticable change in the texture of the ditch light.

Also, on the front the auto numbering is layered behind the black number panel, making it unreadable.

I do not like that to have the ditch lights flash you have to go in the cab to set the side of the engine that they are turned on on and then turn a different knob to make them flash. Also, how comes the doors and windows opened in the U36B but not this? The seat is also way too high, making you unable to see out the back.

There is three light settings for both sides of the engine, making a total of 6. I like that. Except there is no difference between setting one and two and barely a difference between two and three.

So WAY overpriced, again. If you want it, I recommend waiting for a sale. Not worth 20. Not even worth anything more than 10.

Just look in perspective, how much did you get with the GP9 pack or the Dash 9 pack? Even the SD70 packs! Tons of engines included, many model modifications and tons of paint schemes! What we get now? One paint scheme with one model for the same price.

Now look at the U36B. That has one more engine than any other recent pack, and it costs \$5 more. I'm getting real sick of DTG now.

You know, its really sad that I have to look forward to third party developers like Virtual Rail Creations or Eyein12 to get good content.. At first I was disappointed because I thought the game only went up to 30FPS and it felt really weird to me, but then I realized you can switch between 15/30/60 FPS by pressing F4.

Anyway, this is a very good expansion for a very good game. It adds a lot of cool new items and graphics to the game that I would have never thought I needed. Scrolls that create a bridge through difficult terrain, many different potions and effects, improving the starting castle. This expansion is worth it.. An amazing enthralling story that can be played over and over and over and over (where was I, ow ya) again.

But in all honesty, I can't recommend this game enough and also you could probably run it on a toaster so there's that.. i dont know what im doing, looks cute though. Very hard game, but if you get anywhere you get this error:

```
#####  
FATAL ERROR in  
action number 1  
of Step Event0  
for object obj_enemyMissileTurret2:
```

REAL argument is unset

#####

called from - gml_Object_obj_enemyMissileTurret2_Step_0 (line 15). Should have read the reviews first, so I take part of the blame for this crappy experience. Game is buggy, broken and doesn't even get past the opening scene majority of the time before completely freezing up. It is not worth it, not even if it were free. Complete rubbish.. Not bad... but not really good either. It feels repitative, and rather than harder puzzles, they become tedious.

Frustrating, but enjoyable. A tower defense based on the soundtrack. The puzzles in the game will drive you mad and keep you coming back. :). I love just about everything about this game. I love how the cars handle. I love the environment for its novelty and variety. I love pulling off the jumps. I love ramming people in the shin and making them hop on one foot. I love the music. The difficulty is just right, so I'll play a track a dozen times to get that gold medal. I've never been big on racing games, but I'm glad I discovered this one.. Beautiful, cool, funky, weird, and funny game. I don't believe that a game should get on Steam simply because it is free, but this one deserves respect! Worth every moment I played it. 10/10. Fundamentally broken. Not worth £19.. Akane is a time-wasting, absolute great game it can help you relieve stress (IMO). It has great visuals and sprites during the gameplay. 10/10 would like to see more from these devs in the future.. Ahhhh Moment of Silence, does it get anymore mediocre? Released back in 2004 you would swear it was made in 1994. It falls for a lot of the pit falls many 90's point and click adventure games did back in those days(I still loved many) and the graphics are about on par for the era. You will find yourself wondering have I explored this whole area or do I need to attempt to walk off screen in some weird fashion(yes it's one of those)? You will also find yourself at the mercy of multiple illogical or poorly designed puzzles although the game isn't terribly difficult. It is packed with boring dialogue and little action even for an adventure game. The game has a post 9/11 USA feel to it with government so large it is watching everyone all the time. Very Orwellian feeling. I actually did enjoy this aspect of the game and the statement it was trying to make but not enough to forgive its annoyances. Play it if you've already played through all of the great point and clicks but please, dear god, don't make it one of the few you'll ever try. You may find yourself wondering,"I haven't even played through all the Sam and Max franchise what am I doing playing this #\$\$%&!". for \$1, it is super fun.. This was more fun than i anticipated.

you have several different " device" ships, a gigantic skill tree thats the honey-comb looking thing you see in the screenshots, it's HUGE.

you also have " classes " each tier has several to choose from, all have positive and negatives - huge customization, each level brings more classes and the cost goes up/

And all of these things, can be re-rolled, and done again.

It's almost endlessly replayable in this way.

The main game is a simple Asteroids - type game. You rotate the ship, it propels at it's own velocity (depending on what device type it is, and all the passives you have applied, plus class benefits) and it auto fires as well under the same rules.

Then, there's barrages (a huge rapid fire burst of bullets from you) a shield ring (more rings = more shields) and a bunch of different weapon types you pickup as powerups in the game, and also these nodes that give you benefits as well ! There is a lot going on. It's a slow boil, but when you start boiling.. it's very hard to put down.

it has a good " just one more round " gameplay loop going for it.

absolutley recommend.. I enjoyed this RTS, it has some really cool mechanics and the quests inside it are rather immersive.

The game, however, lacks replayability. Considering how cheap it is, I'd recommend it.. Kind of cheesy, but fun.

The set-up is about as self-indulgent as you can get, with one guy in an otherwise all-girl school. Heck, he even won the lottery on top of that. The antagonists, such as they are, are all cartoonish to the max, with exaggeratedly evil character traits. But it doesn't stick on any one story arc for too long, so no single conflict or issue really overstays its welcome, and they mostly play to their strengths, which is moeblob comedy hijinks and romance.

And the romance *is* cute, it has some decent comedy moments, and it holds up as an enjoyable little read and doesn't feel compromised despite the--*cough*--missing content. I've only played through one route so far, but all of the girls seem like they're equally fun. You could do a lot worse than this for light romance fluff reading if you grab it on sale.
